(FOR KEY SEE REVERSE)

- On 15 April 1955, a selected number of specialists at the Pirna-Sonnenstein compound of the former HV 18, now called Main Administration for Industrial Requirements,¹ were informed that a conference was to be held about 20 April 1955, in which they were to participate with a number of Soviet experts and in which the details of the future work to be carried out in Pirna-Sonnenstein were to be determined. In particular, this conference was to decide what types of aircraft were to be constructed in addition to the MIG-17, which by that time was to be under development. Furthermore, the conference was to establish the main lines of the organizational structure of the Main Administration for Industrial Requirements.
- Among the German technicians invited to participate in the conference were Ing. Otto Rademacher, Dr. Gerhard Cordes and Ing. Schotte (fnu). Dipl. Ing. Brunolf Wilhelm Baade was not at Pirna-Sonnenstein when the invitations were issued.

1. Comment: Under the jurisdiction of the Ministry for Machine Construction.
